and the process of information-seeking. The research group has also been actively involved in developing new methods for conducting qualitative research. In addition, the group has been successful in securing external funding from several sources, including the Swedish Research Council for Health, Behaviour and Society (2003–2005), the Swedish Research Council for the Environment, Agricultural Sciences and Spatial Planning (2004–2007), the Swedish Research Council for the Sciences (2005–2006), the Swedish Research Council for the Environment, Agricultural Sciences and Spatial Planning (2007–2009) and the Swedish Research Council for the Sciences (2008–2010). The group is currently conducting a study on information-seeking among young people in Sweden [14].

The authors have written and co-edited several books. The book *Qualitative Interviewing: The Art of Hearing Data*, edited by Kvale and Brinkmann [15], is now published in Chinese and Japanese. The book *Handbook of Qualitative Data Analysis*, edited by King, Kvale and Brinkmann [16], is now published in Chinese. The book *Qualitative Data Analysis: A Realist Approach*, edited by King [17], is now published in Chinese. The book *Qualitative Interviewing: The Art of Hearing Data*, edited by Kvale and Brinkmann [15], is now published in Chinese.

The authors have also co-edited several special issues of journals. The special issue *Qualitative Interviewing: The Art of Hearing Data*, edited by Kvale and Brinkmann [18], is now published in Chinese. The special issue *Handbook of Qualitative Data Analysis*, edited by King, Kvale and Brinkmann [19], is now published in Chinese. The special issue *Qualitative Data Analysis: A Realist Approach*, edited by King [20], is now published in Chinese.

The authors have also co-edited several books. The book *Qualitative Interviewing: The Art of Hearing Data*, edited by Kvale and Brinkmann [15], is now published in Chinese. 1. The first step is to identify the problem or question that needs to be solved. This involves understanding the context and the specific requirements of the task.

2. Next, it is important to gather relevant information and resources. This may include researching existing solutions, consulting with experts, or collecting data.

3. Once the information is gathered, the next step is to analyze it and identify the key factors that influence the solution. This often involves breaking down the problem into smaller, more manageable parts.

4. After analysis, a plan should be developed. This plan should outline the steps that need to be taken to solve the problem, taking into account the resources available and the constraints of the situation.

5. The final step is to implement the plan and monitor the progress. This involves carrying out the tasks outlined in the plan and making adjustments as needed based on the results.

6. Finally, it is important to evaluate the solution and determine whether it has effectively solved the problem. This may involve comparing the results to the original requirements and identifying any areas for improvement.
